

SAFETY SEAL LABELS

INDICATES IF A SANITIZED SPACE HAS BEEN OPENED OR COMPROMISED

PROTECT YOUR CUSTOMERS' HEALTH AND WELL BEING

With the coronavirus pandemic comes a new normal. Designed with the travel industry in mind, safety seal labels indicate if a sanitized space has been opened or compromised. Brand safety seal labels to show you are an industry leader, doing everything you can to protect your customers' health and well being.

HOTEL ROOMS

A safety seal label, sealing the traveler's room door, provides satisfaction that no one has entered the room since it was sanitized for their safety. This temporary label seal is placed between the door frame and door after the room is cleaned and sanitized.

A "VOID" image appears on the facestock when the seal is removed, and no residue or "VOID" is left on the door or door frame's surface. This lets travelers know their room has been cleaned, and no one has accessed the room since it was sanitized.

AVAILABLE IN THREE COLORS

Safety Seal Labels come in three film colors: red, blue and frosted clear. VOID shown on clear material.
